## SET— RODOLFO DORDONI 2011

Set is an experimental lab, a workshop where everything is within easy reach. The design harks back to the solid concept of American kitchens and the atmosphere of traditional kitchens. The shelves are open, like a bookcase. Set can be developed vertically and take up the whole height of the walls. All around, shelves, glass-fronted cupboards, wood paneling and natural materials: stone, steel, glass. The technical components are concealed, for a functional, hi-tech, but nevertheless light and elegant kitchen.

### photo finishings

- stainless steel base unit doors, side panels and worktop
- absolute black flamed and brushed worktop
- light elm cod. ES18 self-supporting wood boiserie
- light elm cod. ES18 Futura 2.0 wall units
