

OTHER COLUMNS—

Extractable column

Perfect storage of supplies in only 30/45 cm width. With hanging and individually height-adjustable shelves, the pantry becomes a flexible space. The width and the full height of the column are fully exploited, without waste of space. Thanks to the shelves with railing, all the content is always visible from both sides, even for high shelves. Up to 100 kg can slide gently out of the closet. The closing movement, if electrified, is activated by a gentle push on the door.

Tandem pantry

It offers new possibilities for storing supplies. The rear trays are forwarded towards the user by opening the door. Rational advantages and emotional characteristics make Tandem pantry special: precision technology, elegance of motion and polished chrome finish. Tandem has been designed for units of furniture 450, 600, 900 and 1200 mm wide.
