

## VELA— DANTE BONUCCELLI 2014

Doors are a mere 13 mm thick, slim to the point of imperceptibility. Technology is cutting edge and uses different materials, balancing the tensions and designing new proportions and special technical details, including the original mechanism that allows doors to swing. Countertops present overlapping lines that conceal the manufacturing technology.

### photo finishings

island

- alaska white Fenix® cod. LP101 base unit doors, side panels and worktop
