

Dada

MOVEMENTS—

Dada drawer slide systems are a distinguishing feature. All drawers and containers are fitted with the new Dada movements by Grass. The INDada collection includes the NovaPro “movement” for drawers and containers, a benchmark for all world-class manufacturers. All the other Dada collections feature the exclusive Vionaro “movement” system for drawers and containers, with Dada patented Multilinee black anodized aluminium sides. The exceptional performance of the Vionaro drawers and containers are highlighted by the internal width, 9% greater than the previous solution, and by the possibility of mounting 650-mm sides, with an extra 30% storage capacity. Featuring four different heights (63/89/185/281 mm), the 281-mm Dada drawer is the reference point for top-of-the-range storage capacity and durability, with a dynamic load carrying capacity of 40/70 kg, tested over 200.000 opening cycles.
