CHOPPING BOARDS AND TROLLEYS—

Kitchens are made up of specific spaces where work is concentrated. Cutting and chopping ingredients can be moved wherever necessary.

The lightweight but solid oak chopping board (40x40 cm) is easy to move around the kitchen. The handy front tooth allows the chopping board to be used safely, stopping it at the edge of the worktop. With the same measurements, the pot-holder version is also available.

“Ceppo” provides the chef with an extra working surface, available with or without wheels, to suit the consumer’s needs. It features a thick, solid oak chopping board (60x60 cm); the steel frame ensures great stability, perfect for everyday use.
